Slime Recipe

Try out Nibbles' favourite recipe - if you dare!

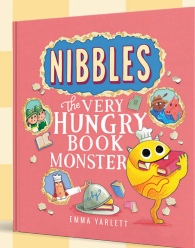

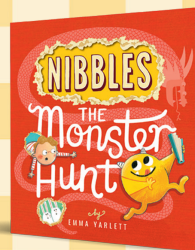

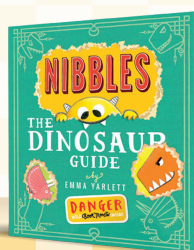

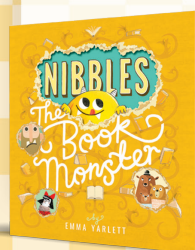

Takes 10 minutes to make!

- 100ml PVA white glue (children's craft glue)
- ½ tsp bicarbonate of soda
- gel food colouring
- 1 tsp contact lens cleaning solution (must contain boric acid)
- glitter (optional)

Instructions

1. Squeeze the glue into a mixing bowl. Add the bicarbonate of soda and mix well.
2. Add drops of your chosen gel food colouring while mixing until you reach your desired colour. The more you add, the brighter the colour will be.
3. Add 1 tsp contact lens solution and mix well for a minute.
4. Once it has formed, take it out and knead it in the bowl with your hands. It will be very sticky at first, but after about a minute or so you'll have a smooth ball of slime.
5. Add glitter (optional) and work in with your hands.

Store in a pot with a lid.
